

# What's Your Name?

You are given the firstname and lastname of a person on two different lines. Your task is to read them and print the following:

Hello `firstname` `lastname`! You just delved into python.

## Function Description

Complete the `print_full_name` function in the editor below.

`print_full_name` has the following parameters:

- *string first*: the first name
- *string last*: the last name

## Prints

- *string*: 'Hello ***firstname lastname***! You just delved into python' where ***firstname*** and ***lastname*** are replaced with ***first*** and ***last***.

## Input Format

The first line contains the first name, and the second line contains the last name.

## Constraints

The length of the first and last names are each  $\leq 10$ .

## Sample Input 0

```
Ross
Taylor
```

## Sample Output 0

```
Hello Ross Taylor! You just delved into python.
```

## Explanation 0

The input read by the program is stored as a string data type. A string is a collection of characters.
